

Codecademy JavaScript

The image shows a completion banner for the 'Learn JavaScript' course on Codecademy. On the left is a dark blue square with a white 'JS' logo. To its right, the text 'Learn JavaScript' is followed by 'Great job completing Learn JavaScript!' and a green 'Completed' button. Below this is a teal bar with the text 'Want more practice and review? Upgrade for the complete experience.', '8 Projects', '6 Quizzes', and a 'Get Instant Access »' link. At the bottom, there are tabs for 'Overview' and 'Syllabus', with 'Syllabus' selected. Under 'Syllabus', item '1 Introduction to JavaScript' is listed with an upward arrow icon.

Overview Syllabus

1 Introduction to JavaScript

I really enjoyed Codecademy and with JavaScript I think it was well taught and easy to learn. JavaScript is a cross-platform, object-oriented scripting language. It is a small and lightweight language. Inside a host environment (for example, a web browser), JavaScript can be connected to the objects of its environment to provide programmatic control over them.

JavaScript contains a standard library of objects, such as Array, Date, and Math, and a core set of language elements such as operators, control structures, and statements.
